SAVING THE ENVIRONMENT – ONE REPAIR AT A TIME

by Sally McGrane

Two years ago a group of retired people in Amsterdam started a project called "The Repair Café". They meet in the basement of a local café for a few hours every week and volunteer to repair things that would usually be thrown in the garbage. The main aim of the project is to help reduce waste and improve the environment by changing people's habits.

Since it began, the project has become more and more popular. People bring in anything from shoes and clothing to lamps and toasters. The repairs are done at no cost by older people who know how to fix things. While waiting, customers like to have a cup of coffee and chat with their neighbors.

"We throw away too many things," says Martha Porter, a retired newspaper reporter who participates in the project. "Many of the things we throw away can be fixed and used again." Porter explains why this project is important. "Discussions on the environment are often about ideas, about what could be done in the future," she says. "This project, however, is about doing something practical right now."

Hans Venda, a professor at De Noors University, thinks the project's social benefits are as important as its environmental ones. "Retired people enjoy their work at the café," says Venda. "They have a chance to get out of their homes and meet people. In addition, many of them have skills that are no longer in demand in the modern world. At the repair café their skills are still valuable. The retired people also feel good about doing something for others and for the environment."

Since the first repair café started, thirty other cafés have opened across Holland. Jan Martin, a 62-year-old artist who opened a café four months ago, says, "These days, if an appliance breaks, you have to pay 100 euro just to see what the problem is. Most people prefer not to fix it. They just throw it away and buy a new one. However, since I opened my café, people's habits in my town are changing. They now realize that they can improve the environment and save money at the same time."

There is a national Repair Café Organization that offers information to people interested in opening repair cafés. You can find tips for raising money and advertising on its Internet site at www.caférepair.com.
